

AIDS Calgary Awareness Association (ACAA) is experiencing difficulties sending email communications to Google hosted accounts (including Gmail) and Shaw accounts. We are working to remedy this issue with those service providers but until such time we would kindly ask that you take one of the following steps to ensure we are able to communicate and respond to your requests.

- Call the office on 403-508-2500 if you do not receive a response to any requests
- Provide your ACAA contact with an alternative email address
- Check your spam/junk folders
- Add the aidscalgary.org email address into your contact list to ensure it is trusted
- Check your firewall and/or with your service provider to ensure they are not blocking the receipt of our email communications
