

How to Wrap Your Cock

Want to have
safer sex?
Here is how to
do it the
RIGHT way.

1

Check the expiry date on the condom. Make sure there is an air bubble by squeezing the package. Take the condom out carefully. Do not use your teeth to tear open wrapper. Watch rings or sharp fingernails that can tear the condom.

2

Wait until your cock gets hard and unroll the condom a bit before putting it on or near your cock. Squeeze the tip of the condom to get rid of any air.

3

Place over the tip of your cock, rolling the condom all the way down the shaft to the base.

4

Spread a water-based lubricant on the outside of the condom when it's on your cock. Be sure that the condom doesn't slide off. Now you're good to go!

5

Withdraw carefully while your cock is still hard.

6

Hold the condom at the base when you pull out, to stop it from slipping off. Dispose of the condom carefully in a trash bin, not down the toilet.

Fireman Steve's Tips on Condom Negotiation

Know your
Emergency Entrances.

Remember to
STOP

DROP

and **ROLL**

Keep condoms and lube
where you fuck.

Nervous about condom
negotiation?

Put yourself at ease by
imagining your partner in
his underwear.

Of course your partner may
already be in his underwear
(or less).
But you get the idea.

No protection on hand?
In case of this Emergency,
PULL

PULL

and **PULL** some more.
(Hand jobs are a sexy and
safer way to play.)

Alarm! If your partner
refuses to play safe,
make an emergency exit.

You'll be glad you did.
